

## Standard Warranty

Unless otherwise specified, all HW products presented in this catalog are warranted against defects in material and workmanship for a period of one year from the date of invoice by RiT to initial purchaser. During the warranty period, RiT will, at its discretion, either repair or replace products which prove to be defective. For warranty service or repair, the product claimed to be defective must be returned to a service facility designated by RiT. Buyer shall prepay all shipping charges to RiT and if, in the opinion of RiT, the product is defective, RiT shall pay shipping charges to return the product to Buyer. However, Buyer shall pay all shipping charges, duties and taxes for products returned to RiT from another country. RiT warrants that its firmware designed by RiT for use with an instrument will execute its functions when properly installed on that instrument. RiT does not warrant that the operation of the instrument or the firmware will be uninterrupted or error-free.

The foregoing warranty shall not apply to defects resulting from improper or inadequate maintenance by Buyer, Buyer-supplied firmware or interfacing, unauthorized modification or misuse, operation outside of the environmental specifications for the product, or improper site preparation or maintenance. No other warranty is expressed or implied. RiT specifically disclaims the implied warranties of merchantability and fitness for a particular purpose.

The remedies provided herein are Buyer's sole and exclusive remedies. RiT shall not be liable for any direct, indirect, special, incidental, or consequential damages, whether based on contract, tort, or any legal theory.
